DETAILED ACTION

Election/Restrictions

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
 - I. Claims 1-18, drawn to apparatus/method for variable bitrate coding of interlaced/progressive motion pictures, classified in class 375, subclass 240.12.
 - II. Claims 17-24, drawn to apparatus/method for motion picture conversion from interlaced to progressive format, classified in class 348, subclass 448.

The inventions are distinct, each from the other because of the following reasons:

2. Inventions I and II are related as combination and subcombination. Inventions in this relationship are distinct if it can be shown that (1) the combination as claimed does not require the particulars of the subcombination as claimed for patentability, and (2) that the subcombination has utility by itself or in other combinations (MPEP § 806.05(c)). In the instant case, the combination as claimed does not require the particulars of the subcombination as claimed because variable bitrate coding for motion pictures conforming to standard such as MPEG-2 does not require the particular of picture format conversion if standard compatibility is not needed. The subcombination has separate utility such as an independent format converter for converting interlaced pictures into progressive pictures for use for example in multi-format decoder.

Art Unit: 2613

3. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

4. In the event that applicant elects group I, this application contains claims directed to the following patentably distinct species of the claimed invention:

- a. species 1 (figs. 1-5);
- b. species 2 (figs. 6, 9, 10);
- c. species 3 (figs. 7, 8, 12, 13);
- d. species 4 (figs. 11, 16);
- e. species 5 (figs. 14, 15);

5. In the event that applicant elects group II, this application contains claims directed to the following patentably distinct species of the claimed invention:

- a. species 1 (figs. 17-18);
- b. species 2 (figs. 19-20);
- c. species 3 (figs. 21-22);

Applicant is required under 35 U.S.C. 121 to elect a single disclosed species for prosecution on the merits to which the claims shall be restricted if no generic claim is finally held to be allowable. Currently, no claims are generic.

Applicant is advised that a reply to this requirement must include an identification of the species that is elected consonant with this requirement, and a listing of all claims readable thereon, including any claims subsequently added. An argument that a claim

Art Unit: 2613

is allowable or that all claims are generic is considered nonresponsive unless accompanied by an election.

Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which are written in dependent form or otherwise include all the limitations of an allowed generic claim as provided by 37 CFR 1.141. If claims are added after the election, applicant must indicate which are readable upon the elected species. MPEP § 809.02(a).

Should applicant traverse on the ground that the species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C. 103(a) of the other invention.

6. A telephone call was made to John Holman on May 11, 2004 to request an oral election to the above restriction requirement, but did not result in an election being made.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

7. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Vu Le whose telephone number is 703-308-6613. The examiner can normally be reached on M-F 8:30-6:00.
